

Where do baby animals come from?

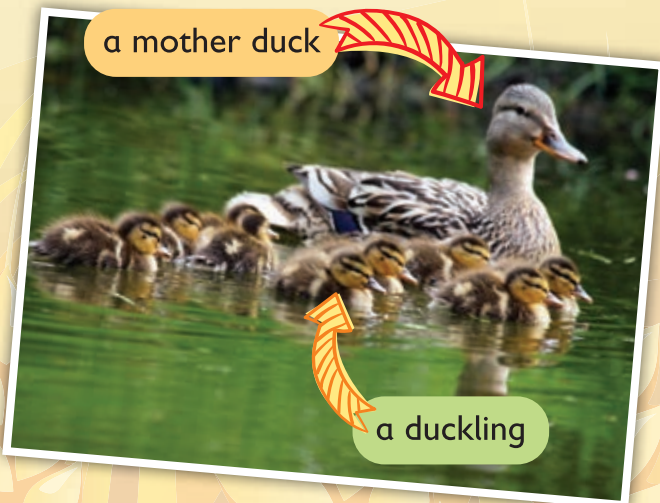

Some animals lay eggs. The baby animals grow inside the eggs and then come out.

a hen (a mother chicken)

a chick (a baby chicken)

a mother duck

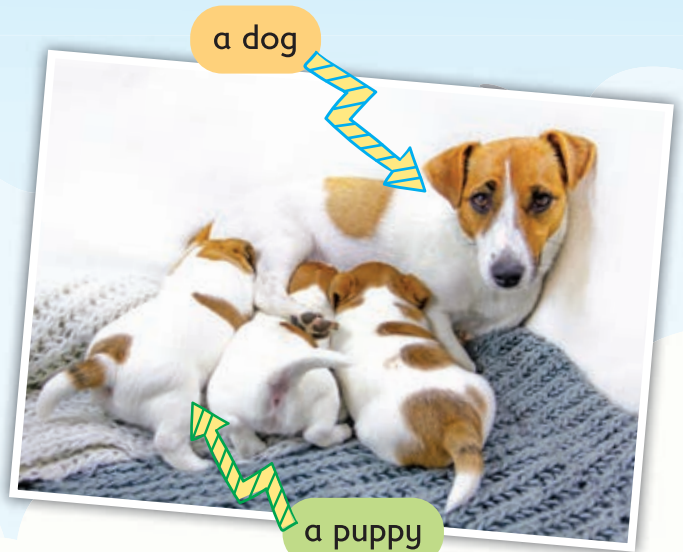

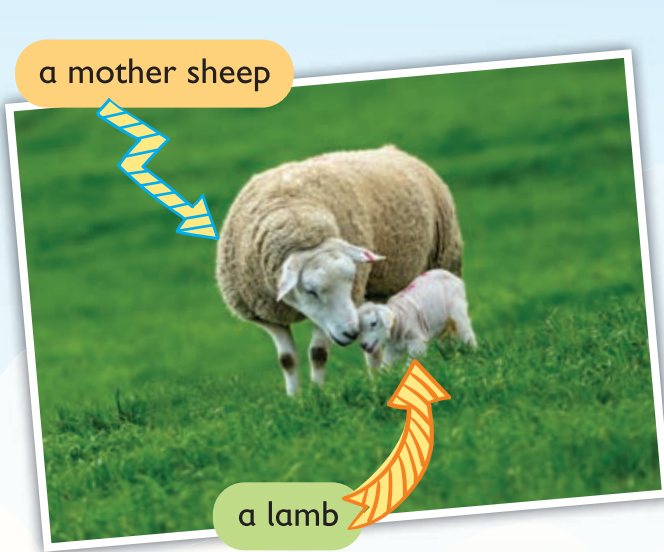

a duckling

a mother goose

a gosling

Some animals give birth to babies. The baby animals drink milk from their mothers.

Put the animals in the correct places in the table.

dog

chicken

duck

sheep

cat

goose

lay eggs	give birth to babies

Virtual zoo

Can you visit a zoo at home? Yes, you can! Some zoos let you see their animals through a live webcam!

You can also take a virtual tour of the zoo on your computer or phone. The zoo guide takes you up close to the animals.

You can listen to zoo keepers talk about the animals.

These are sea lions. They can walk on all four flippers.

Is this a sea lion too?
No, it is a seal. Seals cannot walk but they are good swimmers.

What can you do at a virtual zoo?

Tick (✓). (You can choose more than one.)

- A see animals on the computer
- B see animals face to face
- C feed animals
- D learn about animals

Home Sweet Home

People live in different types of houses around the world.

Many people in big cities live in housing estates.

This is my building. I live in a flat on the 23rd floor.

This is a house. It is big and it has a backyard.

We are having a barbecue in our backyard. Yum!

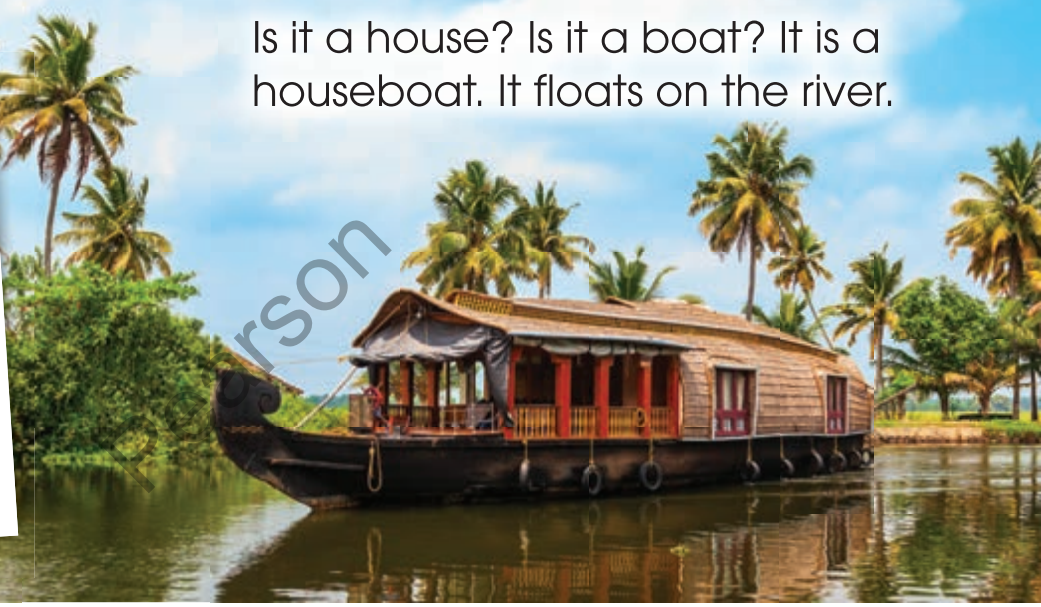

I am milking a cow.

This is a farmhouse. There are farm animals like sheep and cows around.

I can swim and fish right from my home!

Is it a house? Is it a boat? It is a houseboat. It floats on the river.

Where do the children live? Write the correct letters in the boxes.

- A** = a flat
- B** = a house
- C** = a farmhouse
- D** = a houseboat

1 I am playing with my dog in the backyard.

2 I am feeding a cow.

3 My parents and I live on the 15th floor.
